Dear Tony:

It has now been 3 months since you renovated our kitchen with new cabinet doors, new drawer fronts, and new Corian counter tops with built-in sink and new faucets. In addition we purchased and you installed a new glass cook top.

Each day that we now use the kitchen we are reminded that we made the right decision to do this, and more importantly, that we chose the right contractor to have it done. The entire operation took only a few days, and was finished just in time to fix a Thanksgiving dinner for out-of-town family.

We continue to be pleased with the excellent workmanship that resulted in an entire makeover of the kitchen. Our initial plan was to have Formica (or similar) counter-tops, but we have never regretted the decision to spend the extra money for Corian. Very important to us also was the fact that you took a personal interest in the work being done – visiting the site several times during construction and promptly returning our several phone calls.

Please feel free to refer potential customers to us. We will be glad to pass along an excellent recommendation.

Sincerely,

Hans & MarJean Schapsmeier
